

# Main- & Bypasschimney

## Gent, Belgium

- ✓ Main chimney and by-pass chimney made for a gas turbine with a downstream waste heat boiler. The by-pass chimney stands on a steel construction and can be operated through a 3-way valve in case of a maintenance of the boiler.
- ✓ Due to the high acoustic requirements, acoustic backdrops have been installed in the by-pass, which can handle the temperature of 556°C without any problems.
- ✓ The main chimney is placed after the boiler and equipped with a 360° mouth-platform with 2m walking width according to the Belgian standards.
